Clone an Existing Campaign

Prayer Campaigns · https://prayer.tools/docs/clone-an-existing-campaign/

Have an previous campaign set up exactly the way you like it? Want to reuse last year's prayer fuel?

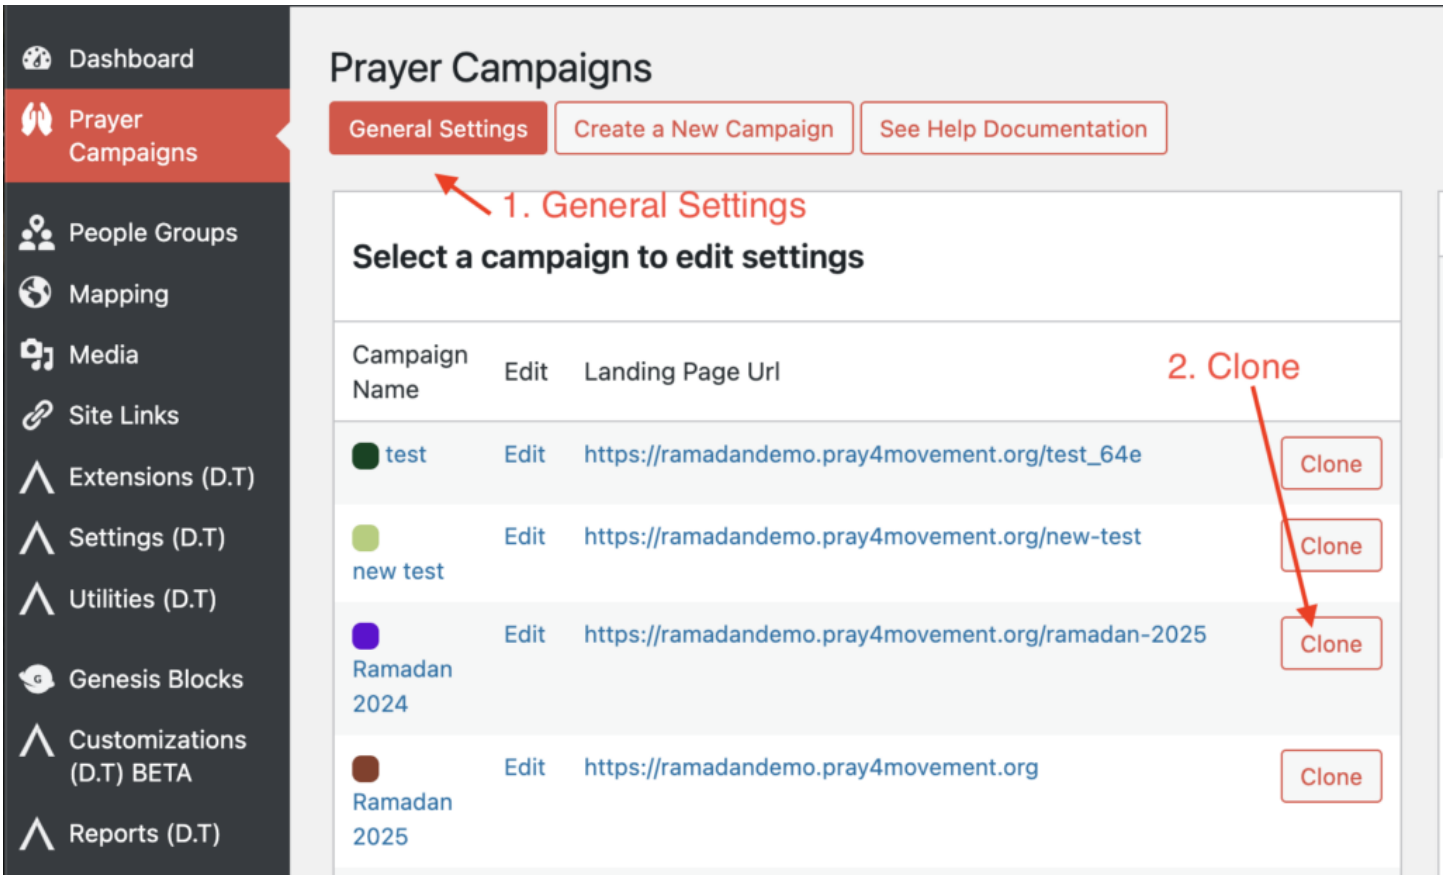

You can simply clone an existing campaign to copy all the settings and prayer fuel to a new campaign.

1. Clone the campaign

Head to the Campaign Settings.

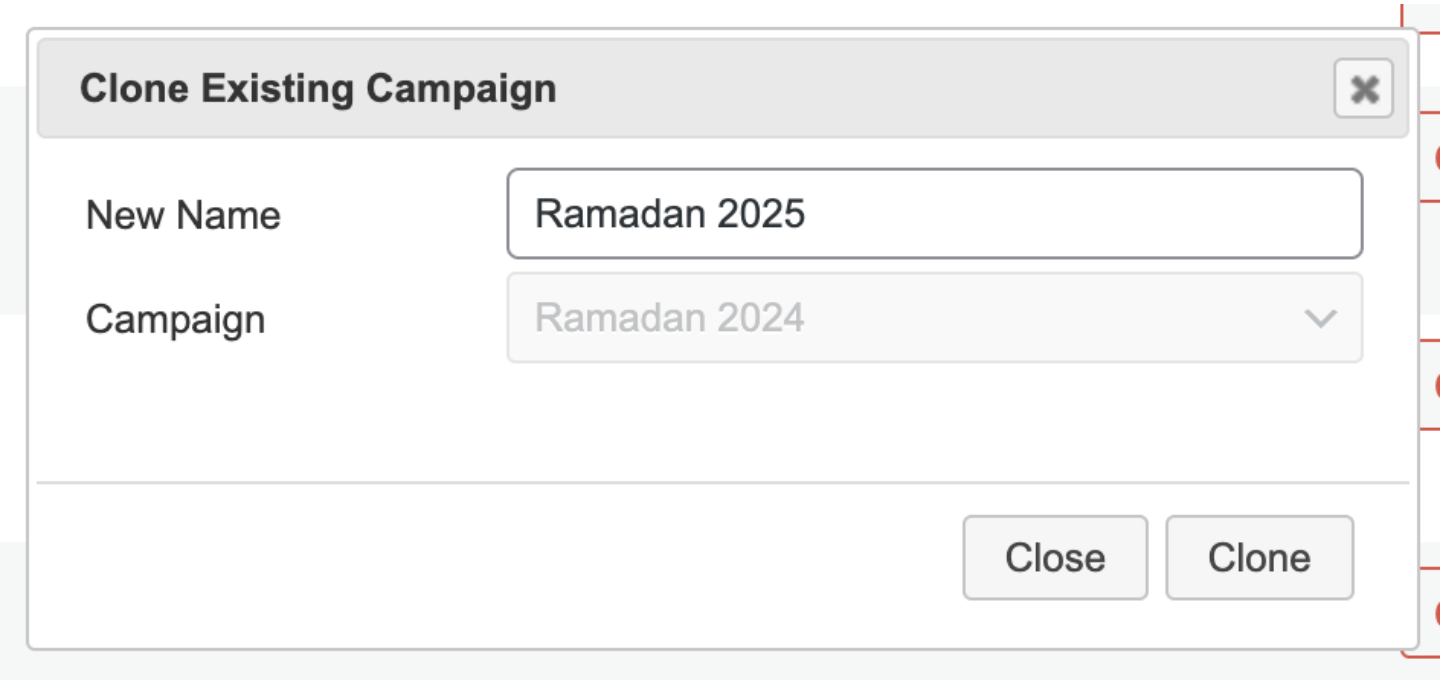

Click the "General Settings" button at the top.

Find the campaign you want to clone and click the "Clone" button.

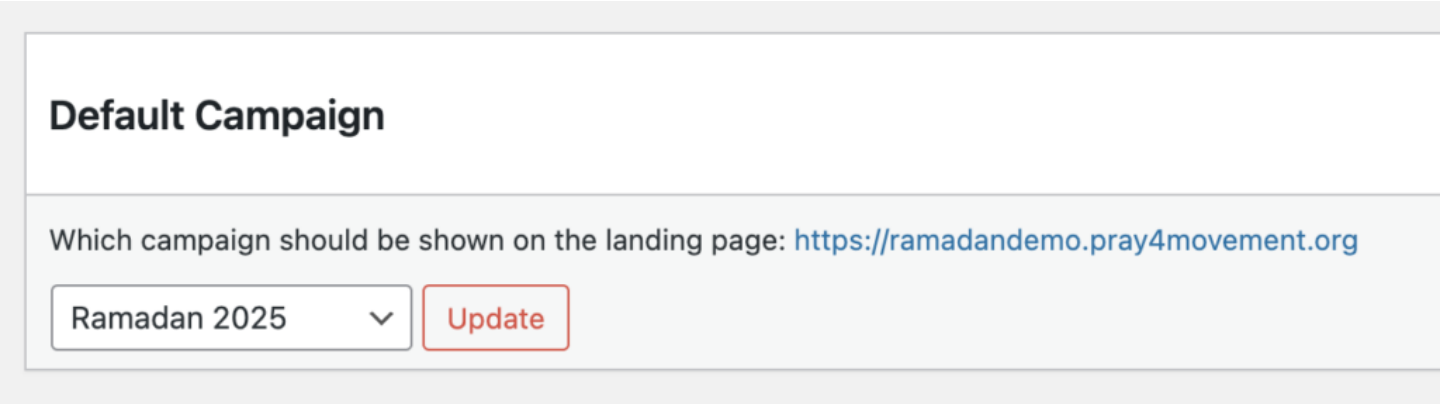

2. New name

Give it a new name, like Ramadan 2025

3. Update the Settings

- On this General Settings page choose if you want this new campaign to be the default campaign. The default campaign is the one users will see when coming to your website.

Click "Edit" next to the new campaign in the list to edit the settings.

- Update the campaign dates
- Update any other details you want to change on your new campaign.

- Check the Prayer Fuel tab to make sure the prayer fuel has been copied over too. Modify any titles or content that need to be updated.

Note: Subscribers from a previous campaign are not copied into the new campaign when cloned. Everyone will need to sign up again and choose the date(s) that they will pray and reconfirm their contact details.
