Exporting and Importing

Ramadan · https://prayer.tools/docs/exporting-and-importing/

Exporting

Go to your Campaigns settings page in the WP admin.

Go to the Install Prayer Fuel Tab.

In the "Export Prayer Fuel Posts" section click "Export prayer fuel [language]."

This will download a .xml file with all the prayer fuel in the selected language.

We can now use this .xml file to import the downloaded prayer fuel into any campaign.

Importing

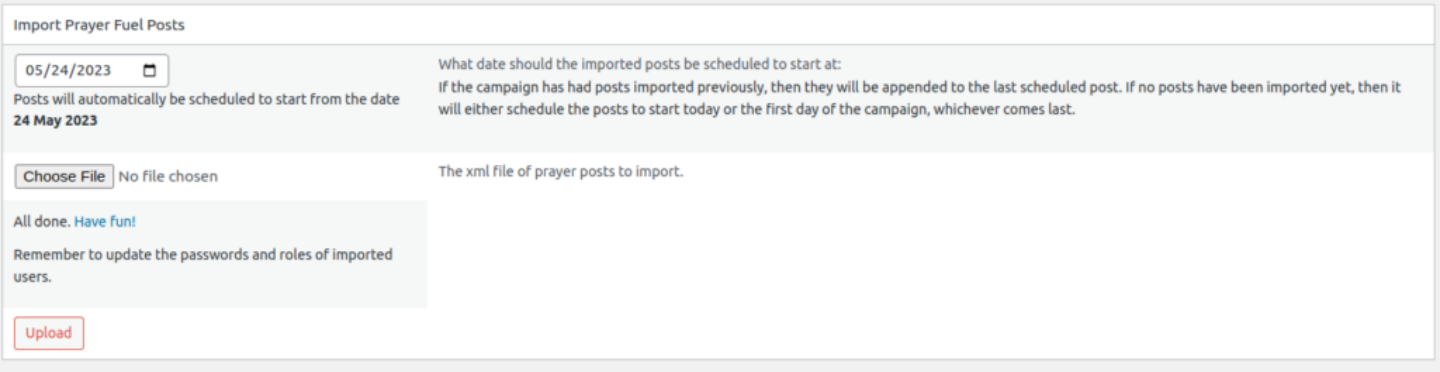

Go to your Campaigns settings page in the WP admin.

Go to the "Install Prayer Fuel" Tab.

In the "Import Prayer Fuel Posts" section click "Choose File" and select the .xml file you want to import.

Check that the date is correct (usually the start of your campaign).

Click upload.

You can see and edit your imported posts on the "Prayer Fuel" tab.

Existing Prayer Fuel Libraries

Looking for existing prayer fuel to use with your campaign?

The pre-prepared libraries are just for you. You can browse each day's prayer fuel and download the full list.

- Ramadan libraries

Import the downloaded .xml file with the instructions above.

Please contact us if you would like to contribute your prayer library to the shared prayer fuel!
